

Patty's Plants

NEANTHA BELLA PALM
Chamaedorea elegans
Parlor Palm

This is a great low light palm. It is easy and can tolerate less humidity than most palms. The parlor palm is a smaller growing palm that only gets around 3 ft. It is native of Mexico.

An east or even a north window is great for this palm.

Let the soil dry slightly between watering.

Repot every 2-3 years using worm casting in the soil mix. This is a very slow growing palm.
